

## Conformity to Specifications Statement

Nutress BV is a Phycom company.

Phycom BV, located in Nijkerk The Netherlands, manufactures and markets nutritional added value applications for feed, food and pharma. This is realized by cultivating and developing food grade algae(products).

The in-house developed closed cultivation system of Phycom BV is controlled in full. The cultivation process, from start to harvest, is standardised and closely monitored. If any deviation occurs, it is observed in a timely manner and the culture is discarded. This assures a uniform final product.

As a benchmark the final product is analysed once a year by third party laboratories. The most recent results of analyses are represented in the specification sheet(s). The products of Nutress meet these specifications.

This message is read and approved by Mr. R. Noteboom, QA Manager of Phycom BV on June 21<sup>st</sup> 2017.
